

## HOME VISIT ADMISSION FORM

<b>Name of owner</b>		
<b>Name of rabbits</b>		
Home address		
Email		
Phone number		
Emergency number whilst away		
Do you wish to be contacted in the event of an emergency?		
***emergency treatment protocols are covered within consent form document.		
Name of vet practice you are registered with		
Contact details of vet practice		
Do you have pet insurance?		
Insurance details		
<b>Please use spaces to write dates and ideal times for visits. (dependant on my childcare/ routine)</b>		
Total number of visits:		
Total estimate of boarding cost:		
50% to be paid on arrival (full amount can also be paid) <b>Cancellation charges:</b> 25% cancellation fee 4-2 weeks before home visit start date, 50% cancellation fee less than 2 weeks before home visit start date		
£10 per visit plus 45p a mile from CB22 5AE and back.		

<b>Name of rabbit</b>	
<b>Age &amp; gender</b>	
<b>Does your rabbit normally live indoors or outdoors?</b>	
<b>Neutered/spayed?</b>	
<b>Date of last Myxo-RHD vaccine*</b>	
<b>Date of last VHD2 vaccine**</b>	
<p>*expected to be given annually and is required to be up to date to be eligible to board.  **expected to be given every 6-12 months and is required to be up to date to be eligible to board.  There is now one vaccine which covers all 3 diseases which is given annually.</p>	
<b>Has the rabbit been tested for E.Cuniculi?</b>	See leaflet explaining what EC is yes/no negative/positive
<b>Date of last EC blood/urine test and result</b>	
<p><b>Date and length of last Fenbendazole treatment: Panacur/Lapizole</b>  28 days  9 days  This medicine offers protection/treatment for worms and EC. If you have requested that your rabbits free range on Caroline's grass you may wish to treat with Panacur before, during or after their boarding stay as precaution. Cocci, worms and EC can be transmitted via urine/faeces. Uneaten caecals can be a sign of cocci or worms. A simple faecal examination for around £28 can conclude concerns either way. Cocci is treated with Septrin or Baycox. Rabbits known or suspected to have active EC, worms or cocci will <b>not</b> be allowed on grass.</p>	
<b>Please describe your rabbits personality</b>	
<b>Please describe your rabbits feeding regime</b>	
Caroline will recommend any changes and make an individual care plan if required	
<b>Please describe any specific dietary or special requirements for your rabbit</b>	
<b>Please list any ongoing medicines your rabbit is currently taking, including dosing and timings</b>

On admission, all rabbits will receive a health check by Caroline. Caroline holds a qualification from City and Guilds in the safe use and management of Veterinary Medicines that provides training in many aspects including recognising signs of ill health. It is at this point that any outstanding or new health concerns should be discussed and the current state of health of the rabbit(s) agreed between both parties. If you (the owner) is not present, they will be informed of the outcome of the assessment in writing. Caroline's qualification also covers the correct storage and administration of medications, she will happily administer any medications prescribed by a registered veterinary surgeon, which have been recorded in the admission form with consent from yourself (the owner).

Should the initial health check raise any concerns, or if there are any changes to your rabbits condition during their stay, Caroline will discuss the prospect of taking the rabbit for a veterinary consultation with Caroline's local rabbit specialist vets.

1. Helen Inzani at Cambridge Vet Group
2. Iain Cope at Newmarket Vets4Pets
3. Jo Headly at Beaumont Sainsbury Animal Hospital (referral only)

The above vets will be available varied days and times and with possible different costs depending on your budget. Sometimes I may only be able to see their colleagues. ROSS local out of hours clinic IS NOT a rabbit specialist but should be able to deal with emergency care until a properly qualified and experienced vet becomes available. Some non specialist vet practices are able to do tear duct flushes and vaccinations.

**Should my (the owners) rabbit require emergency veterinary attention during its stay I give permission for Caroline to take him/her for a veterinary consultation and act as an agent at the above vet choices, if I am not immediately contactable. The cost of this veterinary consultation is between £40 and £48. if the named rabbit, after veterinary examination requires emergency first aid, treatment and/ or medication I give consent for this to be administered up to an initial cost of £150.** If after this emergency veterinary consultation it is deemed that the condition does not require immediate treatment, I understand Caroline will try to contact me before arranging any further medications or diagnostic tests. Should my rabbits condition change during his/her stay that raises concerns with Caroline but would not be considered an emergency, I understand that I will be contacted prior to any veterinary consultations and treatments.

**I understand that I will be expected to cover any veterinary costs and that this should be settled with Caroline at the point of collection, or paid direct to vet on day of treatment where possible. It is a legal obligation for consent to be gained prior to any non-emergency treatment.** I also understand that although Caroline doesn't charge for her time taking rabbits to the vets, there will be a fee of 45p a mile to cover travel expense. Usually around £18.

**ROSS provides home visits.** Caroline is consented to access the owner's home and garden and provide appropriate care for the owners rabbits on agreed dates. Please provide thorough written instructions for Caroline.

All rabbits are cleaned regularly to ensure good hygiene and comfort.

Unless specific dietary requirements are otherwise stated above, rabbits in Caroline's care will receive a healthy diet of daily fresh herbs/greens, wild forage, Supreme Science Selective and continuous access to good quality hay and bowls of water.

**As the owner, I take full responsibility for leaving the named rabbits in the care of Caroline, (Rabbit Owner Support Services/ROSS) for boarding, behaviour/bonding or nursing for the pre-determined, listed time period.**

**As the owner I take full responsibility for allowing Caroline to care for my rabbits at my home address and entering my property**

**I understand that Caroline will not be held responsible or liable for any unforeseen circumstances that arise during her visit or on her return home.**

**I understand that I will be expected to settle all outstanding payments by the end of Caroline's agreed visits.**

**I understand that Caroline and any veterinary staff involved with the care of my rabbit(s) will act in his/her best interest, with special reference to emergency situations if I am not immediately contactable.**

**After completing the above admission forms, I am happy that the information provided to ROSS is correct and sufficient to provide my rabbit with appropriate ongoing care during their time with Caroline.**
