## Rabbit Rambles : Holiday Boarding Consent Form

**Rabbit's Name:** \_\_\_\_\_

(To be completed per animal)

On admission, all rabbits will receive a check over by Caroline. Caroline holds a qualification from City and Guilds in the safe use of Veterinary Medicines that provides training in many aspects including recognising signs of ill health. It is at this point that any outstanding or new health concerns should be discussed and the current state of health of the rabbit(s) agreed between both parties. If you (the owner) is not present, they will be informed of the outcome of this assessment in writing. Caroline's qualification also covers the correct storage and administration of medications, she will happily administer any required medications prescribed by a registered veterinary surgeon, which have been recorded in the admission form with consent from yourself (the owner).

Should the initial check over raise any concerns, or if there are any changes to your rabbit's condition during their stay, Caroline will discuss the prospect of taking the Rabbit for a veterinary consultation at Vets4Pets Newmarket, who regularly treat Rabbits with the practice owner being a recognised Advanced Practitioner in Zoological Medicine.

Should my rabbit require emergency veterinary attention during its stay I give permission for Caroline to take him/her for a veterinary consultation and act as an agent at the afore mentioned vets if I am not immediately contactable. The cost of this consultation is currently £37.50. If the named rabbit, after veterinary examination, requires emergency first aid, treatment and/or medication I give consent for this to be administered up to an initial total cost of £150. If after this emergency veterinary consultation it is deemed that the condition does not require immediate treatment, I understand Caroline will try to contact me before arranging any further medications or diagnostic tests. Should my Rabbit's condition change during his/her stay that raises concerns with Caroline but would not be considered an emergency, I understand that I will be contacted prior to any veterinary consultations and treatments. I understand that I will be expected to cover any veterinary costs and this should be settled with Caroline at the point of collection, or sooner if necessary and that it is a legal obligation for consent to be gained prior to any non-emergency treatment. I also understand that although Caroline does not charge for her time taking rabbits to the vets, there will be a fee of 45p per mile to cover travel expenses. This usually equates to around £17.

Rabbit Rambles is located within Caroline's home. It is a two bedroom house with a single room dedicated to boarding rabbits. I understand that boarding rabbits will have supervised access to the rest of the house when possible and Caroline will soon have a contained outdoor area for supervised play if consent is gained. Boarding rabbits are cleaned out as frequently as required to ensure a clean and comfortable bed. I have viewed the accommodation and/or have received an adequate description of the facilities and consent to the named rabbit to be boarded there for the duration established on the admission form.

Unless specific dietary requirements are otherwise stated above, rabbits boarding at Rabbit Rambles will receive a healthy diet of daily fresh vegetables, wild forage, high fibre pellets and continuous access to good quality hay and water.

I understand that in the event of a rabbit not being collected on the pre-determined date, for any reason, without discussion with Caroline, after a period of 14 days the rabbit will be handed over to The Rabbit Residence Rescue.

As the owner, I take full responsibility for leaving the named rabbit at Rabbit Rambles for boarding for the pre-determined, listed time period. I understand that Caroline will not be held responsible or liable for any unforeseen circumstances that arise during their stay or on their return home.

I understand that I will be expected to settle all outstanding payments on collection of the named rabbit.

I understand that Caroline and any veterinary staff involved with the care of my rabbit will act in his/her best interest, with special reference to emergency situations if I am not immediately contactable.

After completing the above admission forms, I am happy that the information provided to Rabbit Rambles is correct and sufficient to provide my rabbit with appropriate ongoing care during their stay.
